ENGINEERED FOR ELECTRICIANS

INDUSTRIAL TUBE PRINTER FOR ELECTRICAL MARKING

PT-E850TKW

Twin Engines

Meet the first industrial printers with twin engines. With just one machine, you can print on tubes, labels of up to 36mm and other application; including warning signs and tags.

Zero Fuss

Switch between tube and label printing without replacing or reinserting supplies. Need to replace worn-out parts? You can do it yourself in a few quick steps. It's that easy.

Durable Labels

The printers are compatible with TZe tapes, the toughest auto-laminated labels in the market. Ideal for industrial use, TZe is resistant to water, grease and harsh weather conditions.

Maximum Printability

Print more on each label and ensure the legibility of your text with the benefit of additional printable height.

Perfectly Portable

Get the printer working wherever, whenever with the rechargeable Li-ion battery* and wireless capability.

Compact Design

The keyboard can be placed directly on top of the printer, saving extra space on every workplace.

Brother International (India) Private Limited

Unit No. 801 & 802, 8th Floor, Alpha Building, Hiranandani Gardens, Powai, Mumbai - 400076.

START PRINTING IN 3 SIMPLE WAYS. HERE'S HOW.

1 Print via keyboard (tube and label printing)

Design your tube or label artwork from scratch. Alternatively, for ease of use, use the keyboard to select a template

Select print options via the printer's keyboard

Hit Print

2 Print via PC (tube and label printing)

Use Brother Cable Label Tool software (for tube) or Brother P-touch Editor software (for label) to design your templates

Select print options on your PC

Send the file to print

3 Print via mobile (label printing only)

Design your label artwork on your mobile device using the Mobile Cable Tool or Brother iPrint & Label app

Select print options on the mobile app

Send the file to print
